# Https Request

# Inversion of control

Class A

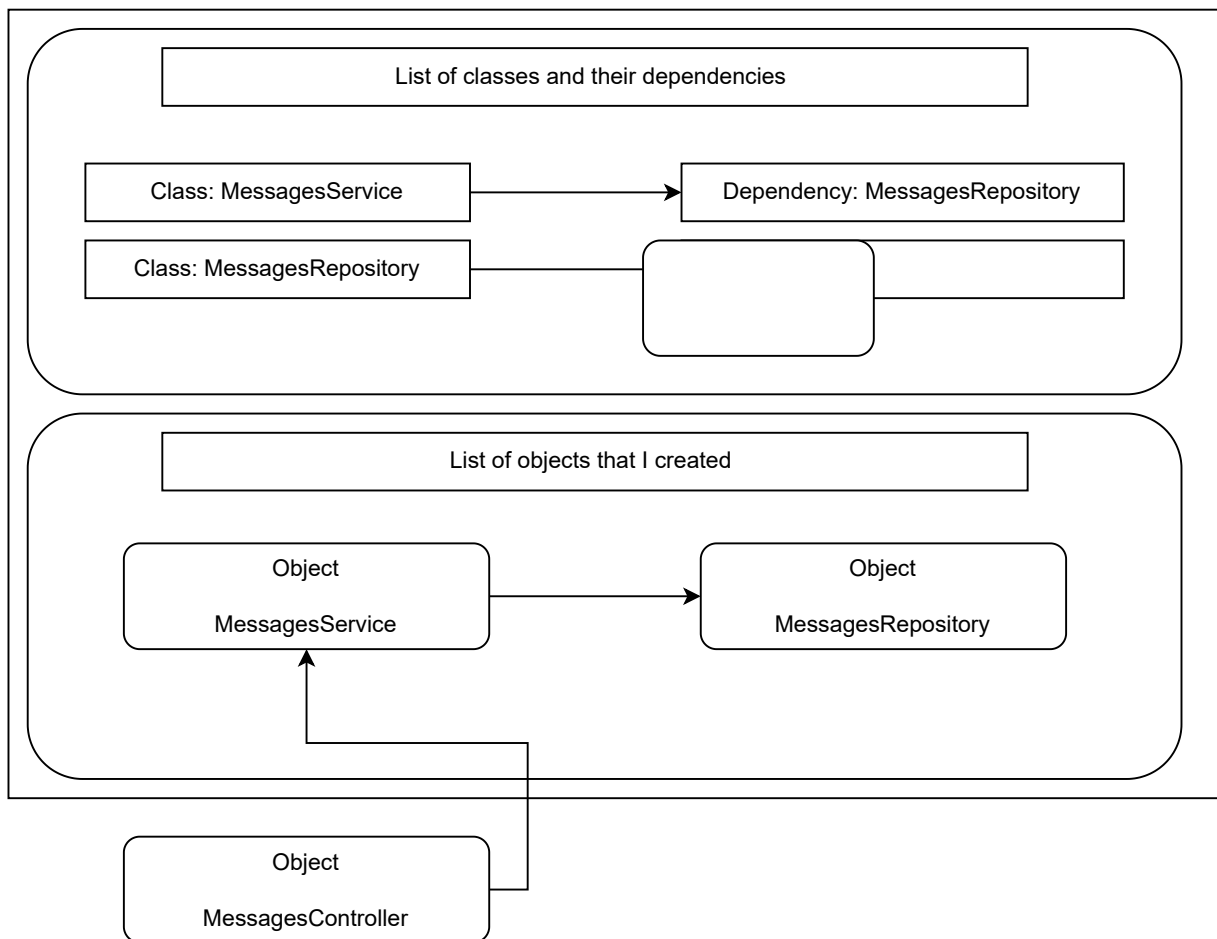

Class B

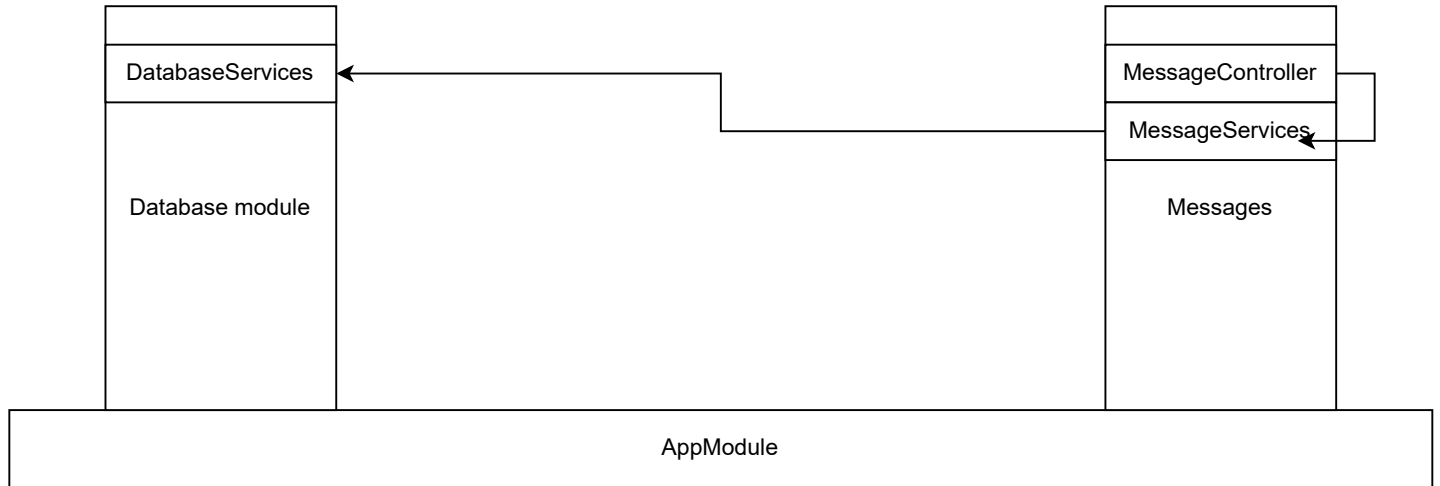

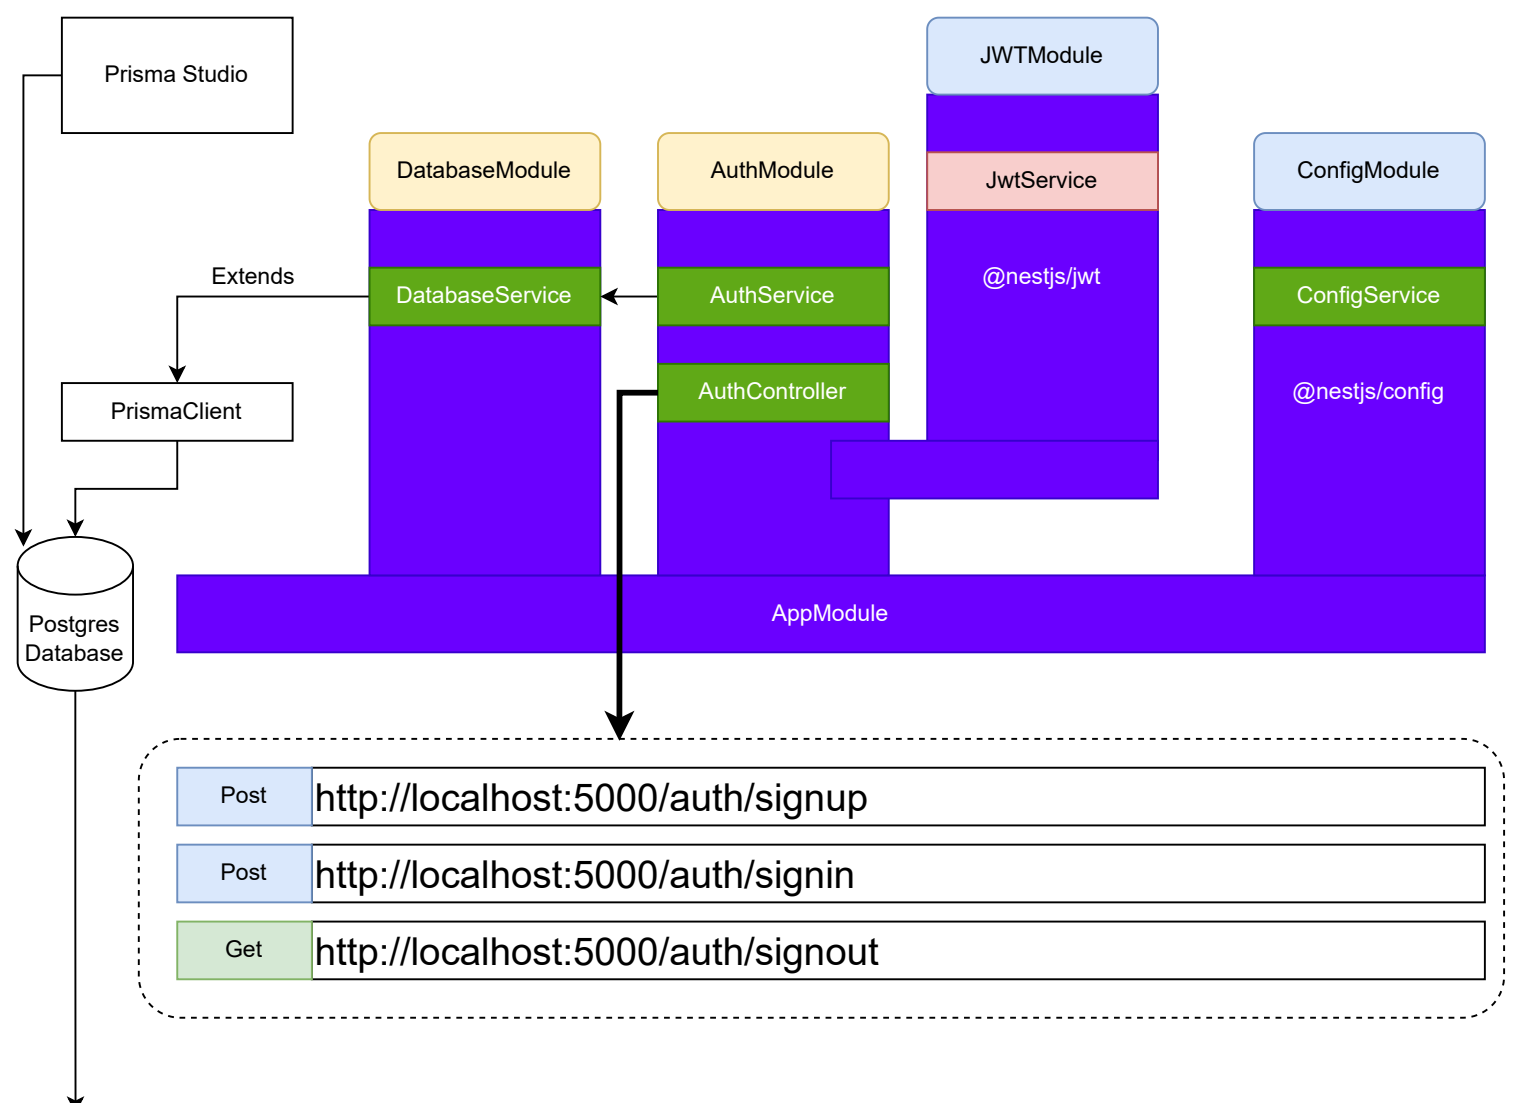

Class A is depend on Class B.  
It needs an object of Class B.

1. Instantiate an object of class B within the constructor of Class A
2. Pass an object of Class B as a parameter to the constructor of Class A
3. Pass a reference of an interface that represent the functionality of class B

## Nest DI Container

```
model User {  
  id String @unique @default(uuid())  
  email String @unique()  
  hashedPassword String  
  createdAt DateTime @default(now())  
  updatedAt DateTime @updatedAt()  
}
```

```
DATABASE_URL="postgresql://postgres:password@127.0.0.1:5432/auth"  
POSTGRES_USER=postgres  
POSTGRES_PASSWORD=password  
POSTGRES_DB=auth  
JWT_ACCESS_SECRET="^Y$R3e(O8i&U)"  
JWT_REFRESH_SECRET="%T3e@W0p^Y$R3e(O8i&U)"
```

```
version: '3.3'  
  
services:  
  postgres:  
    container_name: postgres  
    image: postgres:latest  
    restart: always  
    environment:  
      POSTGRES_USER: ${POSTGRES_USER}  
      POSTGRES_PASSWORD:  
${POSTGRES_PASSWORD}  
      POSTGRES_DB: ${POSTGRES_DB}  
    ports:
